MOSHE DAYAN

085939640536 | moshe4122004@gmail.com | linkedin.com/in/moshedayan/ | moshedyn.site
Cikarang, Bekasi, Indonesia

Final-year Informatics student at President University, passionate about turning technology into real-world impact. I believe it's not about can or can't, but will you? And I bring that drive to every project, from AI to digital transformation. Ready to solve problems with skill, heart, and initiative.

Education

- **President University** - **Cikarang, Indonesia** Aug 2023 - Dec 2026 (Expected)
  Bachelor of Informatics, 3.89/4.00
  Jababeka Scholarship 75% Awardee
  Core Coursework: Data Structures & Algorithms, Web & Server-Side Programming, Wireless & Mobile Programming, Image Processing & Recognition, NLP, Computer Vision, Deep Learning, Software Engineering, Database Systems.

Work Experience

- **Process Engineering Intern | Data & Software Development** Aug 2025 - Present
  PT Mattel Indonesia | Engineering
  Transformed factory operations by moving the production line from manual work to a real-time digital system. Developed a comprehensive capacity planning solution that provided clear forecasts, enabling management to anticipate and prevent bottlenecks. This allowed us to replace guesswork with confident, data-driven decision-making across all key workflows.
  Designed and implemented core data infrastructure, stabilizing the live application by identifying and resolving critical issues. Centralized factory data providing 20+ engineers and managers with instant access, enabling faster, more efficient workflows, and reducing data retrieval time by around 24 hours/week

Leadership & Volunteer Experience

- **Senior Treasurer & Treasurer** Nov 2023 - Nov 2025
  P*resident University Major Association Informatics (HIMA)*
  Led and mentored 2 junior treasurers, managing financial records, accountability, and budgeting for multiple organizational events with a combined budget of over 100 million IDR, implementing treasury workflows, optimized resource allocation, and negotiating with stakeholders to ensure cost-efficiency and develop financial strategies.
- **Treasurer** Jan 2024 - Nov 2024
  President University Faculty Association (BEM)
  Managed finances and resource allocation for Computing Atmosphere 2025, the largest event of the Faculty of Computing (serving around 1000+ participants/with a budget of around 50 million IDR), demonstrating strong financial management and decision-making.

Projects

- **Digital Transformation – Project EDEN - PT Mattel Indonesia** 2025: Led the digital transformation of our production process by designing and deploying a robust, full-stack system that revolutionized how our factory operates, resulting in a 80% increase in forecast accuracy and improved resource allocation efficiency. By moving away from static spreadsheets to real-time capacity forecasting, I empowered management to anticipate challenges and make smarter decisions, ensuring resources are always where they matter most.
- **Deep Learning for Product Package Verification - PT Mattel Indonesia** 2025: Implemented a 4-stage pipeline covering requirement parsing, symbol (object) and text detection/recognition (using YOLO, Hi-SAM, Parseq), and AI-powered refinement/verification (Llama 4 Maverick/Scout). [GitHub: github.com/haysnairpa/ocr-mattel]
- **Space Pals - Children Learning Software about Space** 2024: Developed 'Space Pals,' an interactive children's learning software about space, designed to foster curiosity from a young age. Built with Flutter and leveraging Firebase for data storage and user authentication. Awarded by FINPROTION 2025 (PUMA Informatics 2025) for the best project of the semester, judged by lecturers of Computer Science. [GitHub: github.com/xympyo/spacepal_software]
- **TappyTale - Children Education and Storybook Create Application** 2025: Developed 'TappyTale,' a children's education and storybook creation application for IOFEST 2025. Awarded "Harapan 1" (Top 4 out of 20+ national projects). Features a Flutter/Dart mobile application with
- Laravel web application, sharing database connections via REST APIs. [GitHub: github.com/xympyo/iofest2025_restfulapi]
- **AI ChatBot using DialoGPT that answers Scientific Question Software called Budi** 2025: Created 'Budi,' an AI Chatbot application with Flutter/Dart, leveraging DialoGPT and a Kaggle Scientific Question Answering Dataset. Developed as a key project in the Natural Language Understanding and Generating (NLUG) course. [GitHub: github.com/xympyo/budi-chatbot-software]
- **Homize - Servive E-Commerce**: Developed 'Homize,' a real-time e-commerce platform connecting SMEs (UMKM) and home-based service providers with customers. Built using Laravel, MySQL. Responsible for database management, real-time communication, service listing, user authentication. [GitHub: github.com/haysnairpa/homize]

Achievement & Skills

- **Hard Skills**: Python, Dart (Flutter), Java, JavaScript (React, Node.js), PHP (Laravel), Go, HTML, CSS, SQL, Machine Learning, Deep Learning, Computer Vision, NLP, Random Forest, YOLO, Hi-SAM, Llama, DialoGPT, TensorFlow, Scikit-learn, Flask, Next.js, Bootstrap, Git, GitHub, Firebase, Google Colab, Figma, Blender, RESTful APIs, Database Management, UI/UX Design, Project Management.
- **Competition**: IOFEST 2025 4th Winner (Harapan 1), Duolingo English Test (130 score), FINPROTION 2025 Wireless and Mobile Programming, FINPROTION 2025 Artificial Intelligence, GEMASTIK 2024 Participant, CITEUP 2024 UI/UX Participant, IOFEST 2024 Web Development Participant
- **Soft Skills**: Project Management, Leadership, Communication, Teamwork, Problem-Solving, Adaptability.
- **Language**: Fluent in English and Fluent in Indonesia
